

PRESS RELEASE

Talvor delivers 1000th vehicle to Apollo Motorhomes

June 2 2008

Talvor Motorhomes manufactured its 1000th vehicle for Apollo Motorhome Holidays. The vehicle was a six berth Euro Deluxe motorhome, delivered to Apollo's premium trade event, the 2008 Australian Tourism Exchange, held June 14 – 20.

This achievement has been a goal since Talvor's inception in 2005. Business Manager Paul Truman said Talvor is "very proud" of reaching this milestone.

"The Euro Deluxe is Talvor's flagship vehicle, and as such it is fitting that it should be the 1000th Vehicle manufactured for Apollo," Mr Truman said.

He said clients can see the Talvor range of motorhomes and campervans, including the magnificent Euro Deluxe at the Queensland Caravan, Camping & Touring holiday show, held from June 4 – 10.

Talvor Motorhomes was originally founded to manufacture quality vehicles for the Apollo Motorhome Holidays rental fleet, but due to popularity, has grown to build vehicles to retail specifications.

In conjunction with Australian Motorhomes, the company recently developed the 4 berth Murana motorhome, featuring an innovative bed lift system.

Talvor Motorhomes recently announced vehicle output levels of over 500 per annum, making it the largest Australian recreational vehicle manufacturer in its class. The company's expansions in 2007 contributed to a 1200% increase in manufacturing capacity.

The business doubled their production space, and also invested in a dedicated store, inventory management and materials handling equipment, giving RV enthusiasts even greater access to Talvor's range of quality vehicles.
